

# Human-Computer Interaction

Week 5 Lecture 5A

Cultural Diversity in HCI

COMP 3900 & COMP 6390

Semester 2, 2016

Duncan Stevenson

Australian National University

# Cultural Diversity in HCI

This will run as a discovery session (see the worksheet).

It may be more interesting to have people from different cultural backgrounds in your small discussion group so perhaps move around and find people from different backgrounds to talk with.

Keep in mind the core issues we address in this course: understanding the users' requirements, using design principles, iterating over prototypes, evaluating the users' experiences of our work, understanding the broader context where our work will be used.

# Cultural Diversity in HCI

Remember that we are using first-person statements “In my culture we do ...”

Use the skills you practised in Week 1:

- Listen
- Acknowledge
- Perhaps ask questions to confirm your understanding of what was said
